

POLICY

2003

Administration

POLICY IMPLEMENTATION

The execution, administration and enforcement of all policies of the district is the responsibility of the Superintendent of Schools. He/she shall report to and be accountable to the Board of Education and not any officer, committee or individual member of the Board, in fulfilling this responsibility.

The policies developed by the Board and the regulations developed to implement policies will be designed to promote an effective and efficient school district. Consequently, it is assumed that all district employees and students will willingly carry them out.

There are many activities which are common to all schools, but procedures for conducting them may vary from school to school. Building Principals will establish procedures for conducting activities in their individual schools, but such procedures shall not conflict with district regulations or Board policies.

Adoption date: July 2003
