Instruction

DISTRICT WEB SITE

Communication between the school district and the community and within the various organizations within the district is a critical goal of the Board of Education. One communication avenue is the District's web site. It has been implemented to provide information about curriculum, instruction, school-related activities and other general information related to CCSD's schools, programs and mission.

The Board of Education directs the Superintendent of Schools to develop and implement regulations to ensure the following:

- The district web site provides up-to-date, relevant information for district stakeholders (employees, students, parents and members of the community);
- District web site content is approved, managed and maintained by a district employee;
- All District web site content and links to external sites is consistent with District goals to keep the public informed of CCSD activities and support the success of the educational programs;
- Published district website content is consistent with student and employee privacy and safety requirements; and,
- Published district website content is consistent with copyright regulations and laws.
